

Stop Financing

Funding does not only refer to the doctorate and associated costs, but also includes financing living expenses during the doctorate. The funding should enable a good work-life balance while completing the doctorate.

Scholarship

- scholarships offer financial support, which is divided into monthly, idealistic and one-time funding
- work on a research project
- designing your doctorate according to your own academic interests
- advantages:
 - focus on research without having to worry about a source of income
 - access to additional resources and networks
- disadvantages:
 - high requirements when applying
 - high restrictions on part-time employment

Position in science

- work as a research assistant at a university or university of applied sciences
- work on a research project with subject-relevant topics within one's own field
- opportunity to gain a broad range of experience and knowledge
- advantages:
 - close connection between the research topics and the PhD possible
 - network building and practical experience in research
- disadvantages:
 - fixed-term contracts
 - project-dependent research topics

Position in the industry

- full-time or part-time employment possible
- doctorate is pursued in addition to main occupation
- doctorate and living expenses are fully financed by employment
- advantages:
 - financial security
 - professional experience in practice
- disadvantages:
 - higher workload
 - lack of time to work on the doctorate results in slow progress

Industry doctorate

- link between academic research and industrial application
- doctorate is carried out within the framework of an employment relationship with a company
- research is conducted on a practical problem posed by the company, which provides financial resources and support
- advantages:
 - professional experience in industry and career prospects within the company
 - intensive supervision by experts and specialist departments
- disadvantages:
 - dependent research topics and possible restrictions on publications
 - conflicts between research and business interests

Doctoral loan or doctoral funds

- doctoral loans: low-interest or interest-free loans, which must be repaid after completion of the doctorate
- doctoral funds: one-time grants or regular payments, which generally do not have to be repaid
- advantages:
 - focus on research without immediate financial burden
 - support by financing research costs and materials
- disadvantages:
 - financial burden after completion of the doctorate in case of repayment
