### General information and access via browser

With your student ID you can log on to the computers in the library and in the computer rooms. On these devices, you can save your data on the Hdrive and retrieve this data from another device later.

A university computer will be reset after each reboot and all locally stored data is deleted. However, all data you have stored on your personal H-drive will remain and can be accessed either on any university computer or online via Webfolders. To access Webfolders, please log in here with your university credentials:

https://webfolders.hof-university.de

#### webfolders.hof-university.de

This site is asking you to sign in.
