

### **John Paul Nguafack, student from Cameroon**

"Master Software Engineering, Hof University of Applied Sciences has served as a stepping stone for my career into the international frontier. The Master program has improve my tech know-how on state-of-the art technologies such as Cloud Computing and Mobile Application Development just to name a few. The program is also design to prepare the students for working in Germany as students are required to take a compulsory language course.

At Hof University of Applied Sciences, ultra modern laboratories and classrooms and a highly soffiscated library makes studying very comfortable.

There is low student to lecturer ratio, thus students have frequent access to lecturers for dialogue.

There is a compulsory one year internship to compliment theory with practicals.

The University hold its international students with high esteem, as the International Office assist foreign students in every aspect of life and studies.

The university also makes available several scholarships to assist the students during their stay at the university.

I am very grateful to the university and DAAD for awarding me the Match Funding Scholarship.

Parties frequently organised by students make the social aspect of life equally interesting.

The university also boast of a gym and multipurpose sport complexes for fitness and leisure."
